Tab canoe rallye in Hamburg

Experience nature from its beautiful side

Northern Germany offers wonderful waterways, lakes and canals. There is plenty to marvel at and discover on all sides. Experience the north from a new perspective and navigate together with your team on the water to the tasks and riddles of the scavenger hunt. The tour starts in canoes and is accompanied by our experienced team guides.

Sightseeing tour paired with a scavenger hunt on the water.

Your task is to find your way around with the help of an iPad and to find and solve the tasks we set out. This scavenger hunt on the water is not only fun, but also offers a new environment in which your colleagues and employees can get to know each other in a completely new way. After a short briefing on the controls and paddle and iPad handling, the teams of 7 - 9 go onto the water and into the challenge. They have to navigate the puzzles and solve them correctly on a route that we have worked out in advance. This alone is enough of a challenge for some, but time also plays an important role. All in all, the teams have a good 90 minutes to get back to the finish line in time for the award ceremony.

Highland Games

Conquer your very own world

Who is the strongest Scot? Who can become the king's next bodyguard? Find out at the Highland Games - tactics, team spirit and lots of fun are guaranteed.

The Highland Games date back to the time of the Celtic kings in Scotland. They were held to find the strongest and fastest men in Scotland, who then often became the king's bodyguards and messengers.

Whether it's mug lifting, barrel rolling, nail competitions or archery - there's something for everyone. To get in the mood for the games, the teams first put on their kilts as tournament clothing. Before the various challenges begin, the teams each design a team crest and a battle cry to strike fear into the hearts of their opponents.

Then it's time to show skill, creativity and team spirit and prevail against the other teams in the tournament.

Impulse Chain

Customized team building!

During the impulse chain, you will experience how the cooperation of all participants turns a small action into something “big”. Teamwork par excellence is the order of the day. Construct the most diverse individual reactions with your participants by thinking outside the box and finding creative solutions, communicate with the neighboring teams to agree on functioning interfaces and tinker to your heart's content. This not only brings out the different talents of the participants, but also strengthens the sense of togetherness like never before.

Your participants are first divided into teams and have the task of building various sections with different chain reactions. In addition to classic materials such as mousetraps, balloons, toys, cars, lots of wood and building materials, we also provide very curious objects such as fans, light barriers or alarm systems. This combination of different materials (we are also happy to integrate your products or services) stimulates the imagination of the participants to build the most original and imaginative reactions as a team. The big challenge for everyone is to trigger the individual impulses as effectively as possible and, above all, to pass them on smoothly to the neighboring team. This is the only way to create a chain reaction that is as uninterrupted and spectacular as possible. Lively and transferable one-to-one to everyday working life, this special concept initiates and strengthens the flow of communication across departments, locations or countries and the different skills of your participants guarantee overall success.

The topic of sustainability is very important to us, which is why teamgeist also offers a wide range of activities that focus on social and ecological aspects of our lives. Awaken the commitment of your employees to become active with your company for a good cause.

Sustainability Rallye

An interesting way to experience a sustainable event on the topic of plastic waste is a plastic awareness rally. Tablets are used to navigate and solve tasks. Whether knowledge content, quiz questions or exciting tasks such as “trash” missions are to be completed as desired. During the rally, the aim is to collect as much plastic waste as possible and convert it into points by weighing it.

Insect Hotel Construction

Build your own insect hotel with the materials provided and support the preservation of insect diversity. With this CSR event, you create a valuable alternative to the increasingly scarce natural habitats of insects, which make a decisive contribution to the natural balance of our environment. Optionally, we can impart specialist knowledge and the finished hotels can be handed over to suitable institutions.

Sculpture Making/ Upcycling

Upcycling involves transforming waste products or (seemingly) useless materials into new products. For example, the teams are provided with packaging, fabric remnants and other “garbage”. Based on a predetermined motto, the teams' task is to design an exciting and creative work of art. Company-specific design elements can be agreed in advance and “disposable items” can be brought along by the participants.
